The vehicle specification section assists you with better understanding your vehicle's standard and optional equipment, via VIN decode processing. These processes are generally reliable, and providers work to continually improve their decoding. However, different VIN decode processors may show different specifications. If you have questions, please check with your vehicle's manufacturer. Dealers/sellers also report installed option information, which is provided when available.

Junk/Salvage/Total Loss

Source NMVTIS

This section discloses events related to events like junk, salvage and insurance total loss that have been reported to VINData History. Included are state DMV titles that show junk, salvage or similar brands, insurance total loss events and salvage auctions or junk yard disclosures. Events related to an auto dismantler, auto recycler or crush facility indicate that the vehicle has sustained major damage. A vehicle that has been received by a salvage auction or junk yard usually indicates major prior damage, however these entities also remarket undamaged vehicles. We recommend an inspection by a qualified mechanic.

Good news - no junk, salvage or insurance total loss events have been reported to VINData History.

Title Information

Source NMVTIS

This section identifies this vehicle's current and historic DMV titles reported as issued by date, indicating the state and reported mileage. Title brands that have been reported to VINData History are shown in the "Title Brands Reported" section below. Each title record represents a new title holder, duplicate title, lien release or other title event. Odometer readings are generally recorded when a new title is issued. This information reflects the title information on file with NMVTIS. For more information, please contact the state of title. We recommend an inspection by a qualified mechanic.

Title Issued Date	State	Type	Event	Reported Odometer	Source

2013 AUDI Q5

VIN WA1DGBFP7DA034069

As shown below, all 2013 AUDI Q5 vehicles have had one or more recalls issued by NHTSA. Use the NHTSA box below to check for unrepaired/open recalls. If there is an unrepaired/open recall, the vehicle can be repaired by a local AUDI dealer at no cost to dealers or consumers.

Issued Recall: 17V298000

NHTSA ID:	17V298000
Components:	FUEL SYSTEM, GASOLINE:DELIVERY:FUEL PUMP
Consequence of Defect:	A fuel leak in the presence of an ignition source increases the risk of a fire.
Defect Description:	Volkswagen Group of America, Inc. (Volkswagen) is recalling certain model year 2013-2017 Audi Q5 and 2013-2017 Audi Q7 vehicles. These gasoline-powered vehicles have a fuel pump flange that may crack, allowing fuel to leak.
Corrective Action:	Audi will notify owners, and dealers will replace the fuel pump flange if cracks are present. Flanges that do not have cracks will have a protective film applied. These repairs will be performed free of charge. The recall began July 3, 2017. Owners may contact Audi customer service at 1-800-253-2834. Volkswagen's number for this recall is 20Z8. Note: This recall is an expansion of recall 16V-660.
Manufacturer:	Volkswagen Group of America, Inc.
Recall Date:	05/03/2017
Potential Number of Units Affected:	240487
Notes:	Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov .

Issued Recall: 17V002000

NHTSA ID:	17V002000
Components:	ENGINE AND ENGINE COOLING:COOLING SYSTEM
Consequence of Defect:	If the coolant pump overheats, it can increase the risk of a fire.
Defect Description:	Volkswagen Group of America, Inc. (Volkswagen) is recalling certain 2013-2017 Audi A5, A5 Cabriolet and Q5 vehicles, 2013-2016 Audi Allroad and Audi A4 vehicles and 2012-2015 Audi A6 vehicles. These vehicles, equipped with 2.0l Turbo FSI engines, have an electric coolant pump that can be blocked with debris from the cooling system, resulting in the pump overheating.
Corrective Action:	Audi will notify owners, and dealers will update the software so that the power supply to the coolant pump is deactivated if the pump becomes blocked with debris, free of charge. The recall is expected to begin February 20, 2017. Owners may contact Audi customer service at 1-800-253-2834. Volkswagen's number for this recall is 19M1.
Manufacturer:	Volkswagen Group of America, Inc.
Recall Date:	01/03/2017
Potential Number of Units Affected:	342867
Notes:	Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov .

CHECKVINONLINE

2013 AUDI Q5

VIN WA1DGBFP7DA034069

NHTSA ID:	17V001000
Components:	VISIBILITY:SUN/MOON ROOF ASSEMBLY
Consequence of Defect:	An inflator rupture may result in metal fragments striking the driver or other occupants resulting in serious injury or death.
Defect Description:	Volkswagen Group of America, Inc. (Volkswagen) is recalling certain 2011-2017 Audi Q5 vehicles. The sunroof drainage system may allow water to soak into the foam surrounding the side head air bag inflator canister resulting in the corrosion of the canister. If this happens, the corrosion can weaken the canister and the inflator could fracture without air bag deployment, propelling fragments into the passenger compartment, striking and causing serious injury to vehicle occupants.
Corrective Action:	Audi will notify owners, and dealers will inspect the inflator and either coat it or replace it, as necessary, after removing the surrounding foam, free of charge. The recall is expected to began March 2017. Owners may contact Audi customer service at 1-800-253-2834. Volkswagen's number for this recall is 69P1.
Manufacturer:	Volkswagen Group of America, Inc.
Recall Date:	01/03/2017
Potential Number of Units Affected:	234057
Notes:	Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov .

Issued Recall: 17V622000

NHTSA ID:	17V622000
Components:	ELECTRICAL SYSTEM:WIRING

NHTSA ID:	18V229000
Components:	ENGINE AND ENGINE COOLING:COOLING SYSTEM
Consequence of Defect:	A blocked pump or a short-circuited pump can increase the risk of a fire.
Defect Description:	Volkswagen Group of America, Inc. (Volkswagen) is recalling certain 2013-2017 Audi A5 Cabriolet, A5 Sedan and Audi Q5 vehicles, 2012-2015 Audi A6 vehicles and 2013-2016 Audi A4 Sedan and A4 allroad vehicles. These vehicles, equipped with 2.0l Turbo FSI engines, have an electric coolant pump that can either become blocked with debris from the cooling system causing it to overheat or can short-circuit from moisture within the pump.
Corrective Action:	Audi will notify owners, and dealers will replace the pumps, free of charge. The recall began September 14, 2018. Owners may contact Audi customer service at 1-800-253-2834. Audi's number's for this recall is 19N3/19N4. Note: This recall is in additional to the coolant pump software update applied as a remedy under recall 17V002.
Manufacturer:	Volkswagen Group of America, Inc.
Recall Date:	04/11/2018
Potential Number of Units Affected:	342867
Notes:	Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153), or go to www.safercar.gov .

NMVTIS Consumer Access Product Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on certain automobiles titled in the United States. NMVTIS is intended to serve as a reliable source of title and [brand](#) history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to NMVTIS. However, NMVTIS does not contain information on all motor vehicles in the United States because [some states](#) are not yet providing their vehicle data to the system. Currently, the data provided to NMVTIS by states is provided in a variety of time frames; while some states report and update NMVTIS data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are **strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The [Approved NMVTIS Data Providers](#) (look for the NMVTIS logo) can include vehicle condition data from sources other than NMVTIS.

NMVTIS data **INCLUDES** (as available by those entities required to report to the System):

- Information from [participating](#) state motor vehicle titling agencies.
- Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and tractors. NMVTIS may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.
- Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.
- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
- Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit www.vehiclehistory.gov for details on how to interpret the information in the system and understand the meaning of various labels applied to vehicles by the participating state motor vehicle titling agencies.

The compilation and assembly of VINData™ vehicle history and title reports requires data from multiple third-party data suppliers. Data supplied by NMVTIS or its reporting sources is supplemented with additional various data sources to provide the information contained herein. VINData, a service of VIN Data Products LLC, relies on its data sources for the accuracy and reliability of its information. Therefore, VINData or its agents assume no responsibility for errors or omissions in this report. VINData Products Consumer Access Product Disclaimer

The compilation of VINData Products services, VINData Vehicle History and Title Reports and other history and related products, use data from multiple third party data suppliers and other various data sources which may supplement data supplied by NMVTIS or its sources. Sections of this Vehicle History Report are based on NMVTIS data and NMVTIS data sources as indicated. Thus, the above Consumer Access Product Disclaimer applies solely to NMVTIS data and NMVTIS data sources. NMVTIS provides data directly from its databases to VINData Products consumers through the AAMVA tested and approved VINData Products interface on a "read-only" basis. VINData Products does not supply or enter any data into the NMVTIS databases and is not responsible for supplying any data contained in any NMVTIS Vehicle History Report. Therefore, VINData Products cannot warrant or guarantee the accuracy of any information contained in any NMVTIS Vehicle History Report data.

In the event that NMVTIS Vehicle History Report Data shows current and historical states of title, as provided in any NMVTIS Vehicle History Report, VINData Products consumers have several options regarding full vehicle history records from the current and historical states of title. These records, if such records exist, are available for purchase. Please contact customerservice@vindata.com. Should you require more information, please contact the state of current title and the state of historical title as provided on your Report. This information is subject to change from time to time and is accessible here: [/AAMVA-state-list](#)

Glossary

Information to help you better understand information provided to you in the VINData History report. Please see the report sections page, FAQ, terms of service and disclaimer for more information.

The listing price a dealer would ask for a vehicle available for sale, determined by compiling dealer asking prices.

Vehicle Value:

Monetary vehicle values as calculated by third party companies.

Trade-in Value (Black Book):

The price a dealer would offer a consumer for their vehicle to apply toward the purchase of another car in the dealer's inventory.

Private Party Value (Black Book):

The price you could expect for a vehicle sales transaction between two consumers. Depending on demand and condition, this transaction value will be below the retail value. Private Party transactions are typically less than dealer sales because they do not provide the buyer any financing options, warranty, nor any recourse, should there be any problems with the vehicle. All sales are usually considered final and as is.

Clean Condition (Black Book):

Very little interior or exterior wear. The vehicle is 100% mechanically sound. Any paint repair is almost unnoticeable. The vehicle should be accompanied by a clean history report. All tires should fully match and have good to excellent tread. There should be fewer than average miles for the model year.

Average Condition (Black Book):

The vehicle is solid with substantial serviceable life remaining, but normal interior and exterior wear is allowable. Any previous paint repair must only be apparent to the trained eye. There could be minor mechanical, or maintenance work required. Tires should be in average condition or better and there should be typical miles for the model year.

The compilation and assembly of VINData™ vehicle history and title reports requires data from multiple third-party data suppliers. Data supplied by NMVTIS or its reporting sources is supplemented with additional various data sources to provide the information contained herein. VINData, a service of VIN Data Products LLC, relies on its data sources for the accuracy and reliability of its information. Therefore, VINData or its agents assume no responsibility for errors or omissions in this report. 2013 AUDI Q5

VIN WA1DGBFP7DA034069

Rough Condition (Black Book):

The interior and exterior will show more than normal and expected wear and tear. The vehicle could have excessive miles for the model year and may be approaching the end of its serviceable life. The vehicle could have had previous body damage with possible sub-par repairs. There could be cracked glass. The interior could be torn, stained and have adverse odors. There could be physical or mechanical repairs needed. Tires could be worn and/or mismatched. A negative vehicle history with title brand like salvage, frame damage or mileage discrepancy would push the condition to below Rough condition.

Extra Clean Condition (Black Book):

Appears like new for the model year with very low miles and no visible signs of physical wear. The vehicle history report should have no reported issues or questionable notations. All parts are original and in place. The interior should smell fresh and there should be no tears or stains. It should be mechanically correct with all fluids clean and changed according to the prescribed maintenance schedule. Tires should be like new and completely matching, including the spare.

General Terms

Recalls:

The vehicle's manufacturer, or NHTSA (National Highway Traffic Safety Administration) has determined that the vehicle has a safety or other defect that can affect the vehicle's safety or driveability. Recalls can be repaired at no cost at a manufacturer's franchise dealership.

Title:

Official state DMV document that identifies the vehicle, any lienholder and owner. Rules governing issuance are specific to each state.

Junk or Salvage event (from NMVTIS):

Vehicle was seen at a junk yard, wrecker, dismantler or crusher, or seen at a salvage yard or salvage auction. These vehicles can range from inoperable to fully driveable with little or no actual damage.

Odometer Reading:

Distance (in miles or kilometers) that the vehicle has traveled. Over time, the mileage reported should increase. Many vehicles are driven 10,000-15,000 miles a year; others more or less.

Warranty:

Manufacturer's guarantee or promise to repair or replace defects, usually within a certain time or mileage.

Event Date or Date Applied:

Date the event was reported to have occurred.

Data Sources

Your VINData History report checks for and reports information from the following high-quality data sources. Please see our report sections page, FAQ, terms of service and disclaimer for more information.

POWERED BY

**BLACK
BOOK**

Black Book(R) is a leading provider of vehicle values, bringing VINData History auto values, including pickup trucks and SUV values, RV values, motorcycle values, commercial truck values, and classic car values. Black Book also provides vehicle specifications used by VINData History.

J.D. POWER

In 2015, J.D. Power brought together its industry-leading new car retail intelligence capabilities with the industry's most trusted source for used-vehicle valuations through its acquisition of NADA's Used Car Guide division. In 2017, the company further expanded its valuation offerings through the acquisition of National Appraisal Guides and NADAguides.com, adding motorcycles, RVs, classic cars, boats, and manufactured homes to create the most comprehensive and trusted source for vehicle pricing and information in the industry.

J.D. Power is a leader in providing vehicle data and information to both the consumer and commercial markets, and counts among its customers the nation's leading banks, credit unions, fleet and lease organizations, auto dealers, insurance companies, and government agencies. The company delivers its accurate and reliable values and insights through a variety of products offered through online and mobile applications, and printed guidebooks.

Manheim

VINData History Reports for auto dealers and other commercial users provide Manheim Market Report (MMR) values. MMR is the premier indicator of wholesale prices. MMR helps users research vehicle values quickly and easily. Valuations are based on millions of wholesale transactions from the previous thirteen months, and are refreshed each night. For additional details, please see "MMR Under the Hood" on Manheim.com.

Dealers and other commercial uses: please contact us to get MMR values added to your reports.

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that provides consumers with valuable information about a vehicle's condition and history. Prior to purchasing a vehicle, NMVTIS allows consumers, dealers, wholesale auctions, vehicle lenders and insurers to find information on the vehicle's title, most recent odometer reading, brand history, and, in some cases, historical theft data. See NMVTIS Consumer Access Product Disclaimer

EveryCarListed.com has one of the best and most affordable auto lead programs available. The auto leads are generated across our expansive network of 100+ sites and a reach of 12 million unique visitors a month. They have a unique approach to delivering quality leads to your dealership and your bank/credit union. Auto dealers and banks/credit unions across the country have enjoyed the ROI their unique affordable approach to delivering VIN-specific leads.
